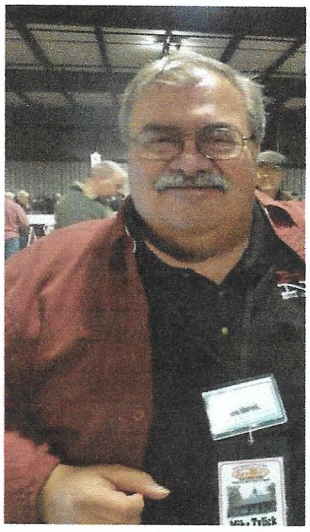
MMR_0523 Michael Tylick



Coming from a lifelong interest in both real and model railroads, I have considerable experience in most facets of the hobby. I have chosen to specialize in model layout design, the revamping of model layout track plans in any scale to any track system, graphic design (control panels, heralds, structure signs, and custom decals) for model railroads, and the construction of structures and rolling stock, both kit and scratch built.

I own my own company: RAILDESIGN SERVICES.

Michael Tylick is a Master Model Railroader (MMR) who has achieved the highest level of recognition in the model railroading community. The Master Model Railroader (MMR) title is awarded by the National Model Railroad Association (NMRA) to individuals who demonstrate exceptional skill, knowledge, and dedication to the hobby.

It's impressive to see enthusiasts like him contribute to the artistry and craftsmanship of model railroads!
